## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fogarty et al. 5979452 in view of Laird 6276661 and Merry et al. 4929235.

3. Fogarty et al. disclose an access port (figs. 4-12) for introducing an endoscopic device, as claimed and suggest that any type of seal means may be incorporated with the access pod (fig. 12) for sealing the access port. Laird discloses a fluid seal being used with an access pod for introducing an endoscopic device, as claimed. Merry et al. disclose a fluid seal (26) and an auxiliary fluid seal (29), as claimed. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to include the fluid seal as disclosed by Laird or Merry et al. into the access port of Fogarty et al. in order to provide a fluid tight seal about the endoscopic device within the access port.
